Online Shopping System.   Prathibha R
                                  1BM18CS074

The online shopping System is used to reduce the time
and effort required for normal. Shopping.
   It helps in managing orders, customers, shipping
carts, admins etc.

→ The system is used by a user who can be an admin, a
session manager, or a customer.
→ The admin handles. all one like create and delete
   departments. and product. He can view the catalog,
   details, update a new product details or existing ones &
   can also manage customers.
→ customer – can register. & login to system can buy
   products by searching. – update. profile & can make
   payment
→ The session manager – listing products. – getting
   customer detail – give order detail.
→ A shopping cart – list of products a customer intend.
   to buy.
→ A various order can be placed in the system by
   giving relevant order detail.
→ There exist different departments which contain.
   various category of products.
→ Once an order is placed, the shipping info of the.
   product must be available. for product delivery
   to customers
